

# GROWING HOME

...

## *2025 Campus Expansion Project*

### **Naming Opportunities**

Growing Home's new facility, farms, and gardens will be a place where plants and people flourish. Your investment demonstrates your commitment to growth and new beginnings for residents of Englewood. Naming a space here establishes a powerful and enduring legacy for yourself, your family, company, or organization. Each naming opportunity is unique within Growing Home's vision to create a space for connection in healing, growth and belonging. Sustainability is front of mind in every Growing Home effort.

A selection of special, individualized naming opportunities are currently available for donations of \$25,000 and above. Investors who name spaces will enjoy prominent recognition within the area they name. Please click [here](#) to view renderings and 3D designs.

For more information, please contact [Janelle St. John](#), Executive Director of Growing Home at [jstjohn@growinghomeinc.org](mailto:jstjohn@growinghomeinc.org).

---

#### Produce Processing Facility - \$1,000,000

At 2660-square-feet, the USDA-certified organic production space will boast four times the space of Growing Home's current area and will be equipped with expansive, state-of-the-art walk-in refrigeration units; abundant cold storage room to keep vegetables fresh; and a spacious open work area for food processing. The larger processing facility will allow Growing Home to sustain our distribution commitment to the Englewood community and build out a larger-scale social enterprise sales model.

#### Commercial Kitchen - \$600,000

Growing Home's food will be assembled and prepared for the Growing Home Cafe and other retail vendors in the spacious, modern commercial kitchen situated in the rear building. The commercial kitchen will also host a new, specialized culinary training program for 15-20 students.

#### Lobby - \$500,000

Spacious, open, welcoming, Growing Home's new 1250-sq-foot lobby will immediately impart a sense of camaraderie with space to gather and socialize for employees, volunteers and visitors. In response to feedback from those who work and volunteer at Growing Home, large steps will be designed for ample seating to relax or chat with a friend. A campaign donor wall adjacent to the main elevator will prominently showcase the campaign's investors.

#### Demonstration Kitchen and Classroom - \$400,000

Growing Home's Demonstration Kitchen will welcome community members. The space will feature flexible seating and learning tables along with monitors for cooking show-like viewing, inviting the participation of local children, community groups, and neighbors. It is here that LaQuandra Fair, Growing Home's Engagement Manager and celebrity chef will produce her culinary segments. An expandable wall between the Kitchen and Demonstration Classroom will offer flexibility to accommodate 24 students and the area will open to views of the courtyard and orchard.

#### Indoor Growing Space - \$500,000

The second floor of the building's processing section will offer 3450-square-feet of open space to accommodate year-round indoor growing of micro-greens and small-scale crops. Utilizing techniques such as vertical systems, controlled temperature and humidity, and optimal water and lighting, Growing Home will be able to boost its food production.

#### Café - \$350,000

Conveniently situated off of the Lobby, a comfortable 495-square-foot café will offer an array of fresh salads, sandwiches and juices and other food items, lovingly prepared in the new commercial kitchen with fresh ingredients grown on site. The cafe will also feature a farm store where Growing Home-grown produce will be available for purchase.

#### Farm Store - \$350,000

Ripe tomatoes, crunchy greens, crisp cucumbers. Bursting with the color and aromatic freshness of Growing Home-grown vegetables and prepared foods, the new 1,060-square-foot Growing Home Farm Store will be visible to the community with its store front location on the main corridor of 59<sup>th</sup> Street.

#### Outdoor Courtyard and Orchard - \$250,000

An orchard filled with trees and comfortable tables where Growing Home employees, job training participants, and community members can take a moment to relax and enjoy a selection of café offerings. And, since the Demonstration Kitchen opens to this area and it will be equipped with an outdoor grill, the space will also be an open-air spot for outdoor cooking demonstrations. Nestled on the west side of the building, adjacent to the lobby, the courtyard and orchard will be a fresh air sanctuary.

#### Computer Resource Center - \$250,000

A hub for IT learning, career exploration, job search, and other research, the 540-square-foot Computer Resource Center will offer a welcoming and comfortable spot where Growing Home participants can receive structured IT training and community members can receive guidance from an IT expert. The convenient spot will feature 18 computer workstations, a resource library, projector, printer, and more.

#### Skyway Bridge - \$150,000

Designed like the wings of a butterfly, the two segments of Growing Home's building will be connected through an elegant second-floor bridge. The conduit will provide seamless access between the community-facing facilities, classrooms, and offices at one side, with the organic produce processing facility and offices located at the other.

#### Demonstration Garden - \$100,000

Fresh air, sunshine, the bright scent of plants and herbs growing. The West direction-facing, 655 square-foot outdoor deck will offer lovely vistas of the Orchard and provide space for a working herb garden.

#### Green Roof - \$100,000

With dramatic views of Growing Home's new campus, the 1030-square-foot Green Roof will serve as a resting spot for bees and other pollinators. In addition, this Green Roof will help provide shade, remove heat from the air, and reduce temperatures of the roof surface and surrounding air.

#### Classrooms (2) - \$100,000 each

These are the spaces where new ideas, skills, and collaboration will be born. With an ample 1385-square-feet of space, workforce development classrooms and meeting spaces will welcome Growing Home's participants and community members, facilitating learning and providing access to new resources. For maximum flexibility, rooms will be equipped with soundproof, adjustable partitions for educational programming, as well as projectors and computer terminals for presentations and public seminars.

#### Green Wall (1) - \$75,000

Prime, highly visible location facing the front of the building. A green wall is a vertical built structure intentionally covered by vegetation.

#### 12 Private Offices - \$25,000 each

Comfortable, and designed for optimal efficiency, 12 private offices, including the IT, culinary and farm offices plus a spacious conference room will make the work of Growing Home's case management, workforce development, farm and administrative staff easier and more productive. Work requires frequent visits to the farm and processing facility, and these spaces will be conveniently located just steps away.
